(57) Abstract :

The titled invention portable crop procuring and protective cabin discloses the design of temporary shelter to procure the crops and preserves them inside the cabin during raining. The shelter is designed as compact with the foldable and vestibule mechanism keeps the shelter so compact while not in use and can be expanded to bring into full size so as to keep the shelter to procure higher volume of crops inside the cabin and preserve them from flood and rain water. The cabin is made of light weight waterproof material and the railings provided on the chassis is guiding the shelter cabin to stretch up to the requirement and the transparent roof keeps the sunlight to enter which dries the crops and removes the moisture present in the crops
